

SAFe Advanced Scrum Master Training

COURSE CURRICULUM & LEARNING GUIDE

Review the complete module outline below, including topics and learning outcomes. Practical exercises are The AgileNow learning activities; certification requirements remain governed by the relevant awarding body.

Module 1: Advanced facilitation

Explore advanced facilitation through practical explanations and a course-relevant example.

Topics Covered

- Team maturity
- Coaching conversations
- Conflict and psychological safety
- Leadership in an ART

Learning Outcome: Explain advanced facilitation and use the covered concepts to reason about a practical scenario.

Module 2: Flow and collaboration

Explore flow and collaboration through practical explanations and a course-relevant example.

Topics Covered

- Kanban and work-in-progress limits
- Bottlenecks and dependencies
- ART coordination
- Flow improvement experiments

Learning Outcome: Explain flow and collaboration and use the covered concepts to reason about a practical scenario.

Module 3: Planning and delivery

Explore planning and delivery through practical explanations and a course-relevant example.

Topics Covered

- Planning readiness and capacity
- PI objectives and risks
- Iteration feedback and system demos
- Quality collaboration

Learning Outcome: Explain planning and delivery and use the covered concepts to reason about a practical scenario.

Module 4: Continuous improvement

Explore continuous improvement through practical explanations and a course-relevant example.

Topics Covered

- Retrospectives and Inspect and Adapt
- Root-cause analysis
- Actionable measures
- Following up experiments

Learning Outcome: Explain continuous improvement and use the covered concepts to reason about a practical scenario.

Module 5: Responsible AI application

Explore responsible ai application through practical explanations and a course-relevant example.

Topics Covered

- Meeting preparation
- Reviewing summaries and suggestions
- Privacy, bias and hallucinations
- Human oversight and current course-version review

Learning Outcome: Explain responsible ai application and use the covered concepts to reason about a practical scenario.

Plan Your Learning

Discuss your experience and goals with our team. Confirm prerequisites, training format, materials, dates, fees and examination inclusion before booking. Course attendance is distinct from earning a certification. This guide is The AgileNow curriculum; it is not an official awarding-body syllabus.
